

Stainless steel & High nickel alloys

Piping & Solutions

is looking for a

Quality Engineer

Reference EC723

THE COMPANY

Based in Walloon Brabant, but operating in an international context, the company is specialized in supplying and machining of stainless-steel industrial piping elements. It has developed strongly and today markets a complete range of products (tubes, fittings, flanges, ...), whether standard or custom. These equipment's are intended for very demanding industries in term of quality, reliability and safety (advanced mechanics, nuclear, petrochemical, cryogenics aerospace, ...).

The company is ISO-9001 certified and its quality system allows it to comply with ASME codes. The company also attaches great importance to the quality of its service with a customer-oriented vision.

THE POSITION

The Quality Engineer is responsible for quality system management, quality control activities and monitoring of orders. In addition, he will be involved in various tasks such as supervising shop orders, and will be in contact with the administration / accounting and internal IT.

More details on demand.
